

EMERALD™

LITE Domes

EMERALD™ LITE-planetariums designed for professional, fulldome production & gaming dome setups with an emphasis on fast installation and ease of use.

The Emerald™ LITE-Domes are the perfect solution for schools, science centers, immerse gaming product - alters the gaming and fulldome experience. The Emerald™'s LITE domes are Lightweight Hemispherical 360-degree Fabric domes. Using the EMERALD™'s unique design you will have an amazing fulldome environment in a snap!

The LITE-dome screen size is 3M-12M in diameter (larger domes available upon special order).

Optimized for digital projection using the EMERALD™'s 'Micro-ElementsIV-Fabric'.

**Massive
Design**

**Screen optimal for
digital projection**

**Fast
evacuation**

**Wheelchair
friendly**

**Three-year limited
warranty**

The dome made out of super light materials so it can be hanged from virtually any surface and at any angle (depending on the model).

The Emerald™ LITE-dome is a great combination of easy installation, 'zero-maintenance', high performance and it is very cost effective.

Using the Emerald™ Fulldome 360-degree Projection Systems you will enjoy a perfect balance between size, cost effectiveness and fulldome image quality. This is a perfect solution for demanding content testing and post-production needs.

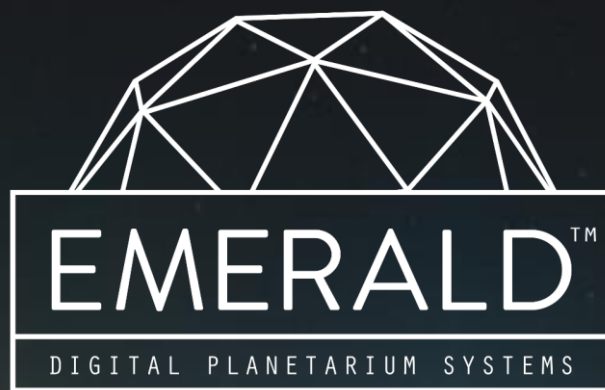

LITE-domes are made out of external "shell" of aluminum/steel poles, external black cover with internal high performance ("flat") projection air pumped screen using internal air-circulation.

They can be hanged from the ceiling or to be used as an integrated unit with an entrance door.
